DAYTON, Ohio, February 23, 1970 --- Dr. Marlan O. Scully, brilliant young American physicist from Massachusetts Institute of Technology, will serve as guest lecturer Thursday, February 26, in the Department of Physics Lecture Series at the University of Dayton. The program, which will start at 7:30 p.m., will concern "Laser Light & Quantum Electronics".

Dr. Scully, who has been named a 1970 Sloan Fellow, is currently under leave of absence from MIT to serve as visiting professor of physics in optical sciences at the University of Arizona. He also is a consultant in quantum electronics for United Aircraft Company.

He served during the past four years as a visiting lecturer in summer programs in Italy and Canada. He lectured in 1967 for the International School of Physics, Enrico Fermi course, an annual summer school experience for professional people. His Canadian lectures were on theoretical physics.

Dr. Scully, who has degrees from the University of Wyoming and Yale and taught at the latter university, recently received the Low Medal for contribution in quantum optics. He also was named to the President's National Research Council in Washington, D.C.
